JR Automation to Exhibit at IMTS 2018

HOLLAND, MI – September 7, 2018 – JR Automation, a leading provider of intelligent automated manufacturing and distribution technology solutions headquartered in Holland, Michigan, will be showcasing at the International Manufacturing Technology Show (IMTS) 2018, an important industry event that brings together high-concept, integrated solutions and real-world applications.

Demonstrating advanced robotic solutions for a broad range of industries, the JR Automation exhibit features two brand-new standard platforms: the Rotary Indexer Platform and the Standard Tray Loader. These flexible, creative systems are designed to maximize productivity and increase throughput. Both systems meet Class 10,000/ISO 7 design standards and include a healthcare-industry-grade stainless steel guard system ideal for sterile environments. The Rotary Indexer Platform integrates FANUC SR3iA and SR6iA robots, which will be connected to FANUC's FIELD system for the duration of IMTS.

“The global JR Automation team is focused on large scale robotic applications featuring a wide range of integrated technologies,” said Bryan Jones, CEO of JR Automation. “Leveraging more than 38 years of industry experience, our team of engineers has developed innovative robotic applications and processes that overcome manufacturing challenges to deliver enhanced productivity while fulfilling strict industry requirements.”

Through thoughtful and dynamic collaboration, JR Automation creates unique solutions for manufacturing companies across the globe; helping them think, solve, create.

JR Automation welcomes guests to [Booth 236275](#) at IMTS 2018, McCormick Center, Chicago, IL, September 10-15, 2018.

For sales inquiries, please call 833-800-7630 or email solutions@jrautomation.com.
